

Hello,

Thank you for taking the time to chat with [name] about the Business Operations Sr. Analyst role with BlueVine. We would like to move you forward in the process. Please take no more than 2 days to complete and return the assignment by submitting it through the link below.

Timing

****This assignment should not go beyond 4 hours.****

Deliverables

1. Document or slides addressing the prompt below
2. Excel (or Google Sheets) file containing your underlying analysis

Prompt

Three months ago, FintechCo launched a new payments product for small businesses.

With the gross profit generated from this product, FintechCo seeks to achieve a 6-month payback on its upfront client acquisition cost (CAC).

The exercise file ("BlueVine - BizOps Exercise - Data") contains information describing the gross profit generated by each client acquired in the first 3 months since the launch of the product.

Using the information available and your own reasonable assumptions:

1. Identify and explain risks to FintechCo achieving its 6-month CAC payback
2. Recommend areas for further investigation, along with any immediate actions you believe are warranted based on the available data

—

The data is attached.

Please let me know if you have any questions.
